

# RULES AND REGS

## HELP MAKE A DIFFERENCE IN YOUR COMMUNITY #CANYEG

1. All teams must have one member who is an architect, landscape architect, contractor, engineer, designer, art teacher, or other designated design professional.
2. All teams are responsible for acquiring/purchasing the cans of food needed for their sculpture.
3. Charitable tax receipts will be issued for donations to the CPCCCS. Receipts are not issued for food purchases or team entry fees.
4. Sculptures must fit within a 10' x 10' area, and be a maximum 8' high (3m x 3m x 2.4m).
5. For safety reasons, there are a maximum of 5 "builders" permitted at any one time to work within the 10' x 10' sculpture area. There can be additional team members working outside of this area during the competition build. There is no limit on the number of people involved in planning, logistics and design.
6. By April 15, 2016, teams must submit: **Title of Sculpture, Description of Sculpture** (short and creative paragraph) and the **Design Concept** (the object you are building). This information is to be collected via the form on our website: [www.canstructionedmonton.com/get-involved/design-description/](http://www.canstructionedmonton.com/get-involved/design-description/)
7. By May 10, 2016 (build day) teams must submit: a detailed list of can food types, and the number of cans used (for event statistics). The **Team Can Count** spreadsheet can be downloaded from our website: [www.canstructionedmonton.com/get-involved/can-count/](http://www.canstructionedmonton.com/get-involved/can-count/)
8. Sculptures must be made of unopened canned food, with minimal elements of non-perishable packaged food. All labels must be intact. No alcohol, glass containers, or pet food allowed.
9. Sculptures must be completely self-supporting, with no framework or other structural support. Maximum 1/4" inch sheets of plexiglass, foam core, cardboard or similar material can be used as a levelling device between rows of cans. Canned food may be joined using the following methods: clear packing tape, double sided tape, duct tape, velcro, fishing line, wire, rubber bands, zip strips etc. Any other method that provides easy demounting may be permitted, provided the labels and cans are NOT damaged. "Clean" structures will be judged superior to those relying on aids.
10. No gluing, welding or other permanent affixing or excessive structural support is permitted.
11. Award winners in the 5 international categories (Juror's Favourite, Best Meal, Best Use of Labels, Structural Integrity and Honourable Mention) will be entered in the International Competition (we submit). Structures that violate the building rules are exempt from the International Competition and are not eligible for local awards.
